SUMMARY

I define myself as appasionate to use my knowledge to develop high quality and efficiency products. I enjoy facing new challenges during the crafting process, which allows me to learn constantly and improve my skills as professional in my specialty area. I stand out by my capacity to collaborate with a team and conduct projects to success through and effective leadership, with the objective of achieve results and grow a comfort environment.

EXPERIENCE

Computer Science Engineer

January 2024 - Present

Xelhua

- Resolved backend problems related to elasicity in distributed systems to recover down containers in Docker
- Succesfully contributed in project development bringning up automatization into failure detection with Python
- Efficency in use of remote connections to administrate and manipulate high perfomance Linux based servers in order to process big volumes of data

Fullstack Developer

January 2023 - October 2023

Calcula UAT

- Developed, designed and applied solutions on different operative systems to create an interactive platform between the dedicated users
- Implemented a mobile application with Flutter as main tool to reach Andorid and iOS to interact with the system
- Deployed a website using Next.js and Google Cloud Services with Firebase to create real time In-Cloud solutions
- Applied data persistency techniques to keep the platform operative even with no internet services available

EDUCATION

Computer Science Engineer

Universidad Autónoma de Tamaulipas (UAT)

Computer Science Technician

Colegio Nacional de Educación Profesional Técnica (CONALEP)

CERTIFICATES

EF SET English Certificate

C2 (80/100) Proficient

SKILLS
